UCNC 2013 is organised by Dipartimento di Informatica, Sistemistica e Comunicazione (Department of Computer Science, Systems and Communication) of Università degli Studi di Milano-Bicocca.

Topics

The topics of the conference include all areas of unconventional computation and natural computation, including (but not limited to) quantum, cellular, molecular, neural, DNA, membrane, and evolutionary computing; cellular automata; computation based on chaos and dynamical systems; massive parallel computation; collective intelligence; computation based on physical principles such as relativistic, optical, spatial, collision-based computing; amorphous computing; physarum computing; hypercomputation. Both theoretical and experimental papers are welcome.

Submissions

Authors are invited to submit original papers (at most 12 pages in LNCS format) using EasyChair.org, at

<https://www.easychair.org/conferences/?conf=ucnc2013>

Papers must be submitted in Portable Document Format (PDF). The revised version of the manuscripts, to appear in a LNCS volume by Springer, must be prepared in \LaTeX according to the LNCS format (see <http://www.springer.com/computer/lncs/lncs+authors>).

The papers must not have been submitted simultaneously to other conferences with published proceedings. All accepted papers must be presented at the conference.

The proceedings will be available at the conference venue.

Authors of accepted papers will be invited to submit an extended and improved version of their contribution to a special issue of an international journal.
